FIG. 8 is a perspective view of the catheter assembly 20 in a retracted position. The catheter assembly 20 includes a handle 22, a catheter body 24, and a catheter tip 26. The handle 22 is connected to the catheter body 24 at the proximal end. The catheter body 24 is a flexible tube that extends from the handle 22 to the catheter tip 26. The catheter tip 26 is a distal end of the catheter body 24. The catheter assembly 20 is shown in a retracted position, where the catheter tip 26 is withdrawn from the patient's body. The catheter assembly 20 is shown in a perspective view, which is a three-dimensional representation of the device. The catheter assembly 20 is shown in a retracted position, which is a state where the catheter tip 26 is not inserted into the patient's body. The catheter assembly 20 is shown in a perspective view, which is a three-dimensional representation of the device. The catheter assembly 20 is shown in a retracted position, which is a state where the catheter tip 26 is not inserted into the patient's body.
